

The power pack

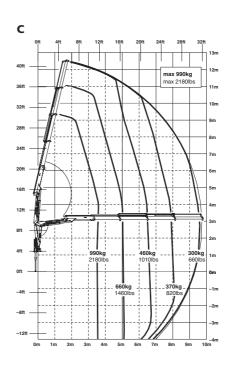

The range of possible uses for the PK 4200 is practically limitless thanks to the large number of different equipment versions. Owing to its massive outreach, it is possible to carry out work which was not previously possible in this metre tonne class. At the same time, the crane's low dead weight enables it to be mounted on very light carrier vehicles.

The completely reworked control valve reduces the pressure peaks acting on the crane even at full load. As a result this significantly increases safety during operation of the crane and the crane's service life.

Suitable for a wide variety of uses due to its enormous outreach
